<input type="radio"/> 800	<input type="radio"/> 1,000	<input type="radio"/> 1.250	<input type="radio"/> 1,600	<input type="radio"/> 2,000	<input type="radio"/> 2,500	<input type="radio"/> 3,200
<input type="radio"/> 4,000	<input type="radio"/> 5,000	<input type="radio"/> 6,300	<input type="radio"/> 7,500	<input type="radio"/> 12,500	<input type="radio"/> 15,000	<input type="radio"/> 25,000

15,000 kg and 25,000 kg as two fall hoist available only

Voltage Volt Frequency Hz one phase three phases

Lifting speeds single speed double speed

Number of load chains 1 load fall 2 load falls FEM group

Lifting height m Length of chain m Length of control cable m

Operating conditions Number of shifts 1 2 3

Load capacity mostly full load % of full load capacity %

How many lifting cycles per hour

Lifting mostly over full suspension height of the hoist
 mostly meters of the lifting height

Suspension fix: one hole suspension eye
 double hole suspension eye
 hook suspension

trolley: push trolley
 electric trolley with single speed
 electric trolley with double speed

Flange width mm Type of girder profile
