

News at Summertime

First of all, thank you for trusting in our products and services! With so many satisfied customers, our order book keeps growing and growing – we like it that way and promise to redouble our efforts for you!

We are currently investing heavily in new production equipment, further training for our existing team, and adding new members to it. As demand is rising, we are fully confident this will allow us to keep serving you reliably and in keeping with our shared expectations of high quality.

Want to know what's new for you in our product portfolio? This newsletter will give you an overview.

New: Star-LIFTKET VFD with fully integrated high-end variable frequency drive

If you have stopped by our presentations at major exhibitions this year, you may already be aware that we are preparing the serial launch of our new VFD-enabled hoist.

Special features of this combination: 200% speed increase w/o load, an external display for all relevant parameters, a top speed of 36 m/min. All this comes in our standard all-aluminium body (050 and 070), which makes this hoist a high-end product with great usability value at an affordable price.

The table below lists all available types.

Kg	ISO	Type	STAR	EN818-7	VFD				
				DAT					
									
kg				mm	m/min				
125	M6	125/1-24	050/52	5,2x15	2-36				
250	M6	250/1-24	050/52	5,2x15	2-36				
500	M6	500/1-18	050/55	5,2x15	2-36				
1000	M3	1000/2-9	050/55	5,2x15	1-18				
	M5	1000/1-6	070/55	7,2x21	1-12				
2000	M5	2000/2-3	070/55	7,2x21	0,3-6				

This product is available from 1 October, 2018.

New: Star-MOPF – upgrade of our “baby” Star-LIFTKET range 020 to 030

We decided to upgrade our small body Star-LIFTKET.

From 1 October, 2018, type 030 will fully replace type 020. This gives users great improvements, notably higher FEM/ISO ratings and stronger DAT chains (5.2 x15 mm), while the dimensions of the unit remain unchanged and the loads and speeds remain the same.

State-of-the-art know-how went into this new generation, which e.g. now features standardised overheating protection.

On demand, for special applications, 020 types can still be manufactured for your custom requirements.

Some examples:

125/1-8; 250/2-4	020/52	->	030/62
250/1-8; 500/2-4	020/54	->	030/64
	020/01	->	030/01
250/1-8/2; 500/2-4/1	021/51	->	031/51
125/1-8/2; 250/2-41	021/53	->	031/53

MADE IN GERMANY

Ask our team about the latest models.
We will gradually upgrade our hoists during the next months, so you may enjoy the benefits mentioned above even before the changeover date.

New: Pricelist changes on 1 October, 2018

A new price list will go into effect on 1 October.
This list is, as usual, an exclusive privilege for our existing partners and distributors. This new list will again feature hands-on improvements to provide more comprehensive information, presented more transparently for you. Just ask for your personal copy in the next weeks.

New: Speedline 5.0 STAR LIFTKET (short delivery times)

Nine months ago, we launched our "Speed Line" range. We are more than satisfied with the success of this concept, which has prompted you to put in a huge amount of orders. "Speed Line" orders of any kind are reliably delivered to you within 15 working days.
Of course, we are upgrading from 020 to 030 models in this line as well.
In addition, we have extended this range to cover up to 5000 kg.

All our products are exclusively manufactured in-house at our plant in Wurzen, hence you get true "Made in Germany" equipment.

Your LIFTKET sales team is always at your disposal for any kind of questions:
