

Climbing to new heights together: our new subsidiary ChainMaster Bühnentechnik

We are expanding our team of application specialists for you: I am pleased to announce that LIFTKET has taken over 100 percent of the shares in ChainMaster Bühnentechnik GmbH as from 1 August 2018.

We have been working closely and very successfully with ChainMaster for over 20 years. Together, we have grown to become market leaders in our individual business segments. Now, we want to continue this successful path.

Located in Eilenburg, only a few kilometers from our premises, ChainMaster manufactures complete system solutions based on LIFTKET electric chain hoists for events such as open-air concerts and theater productions.

Stage technology is already one of our key business sectors, along with industry and custom solutions. In future, we want to expand this segment together with ChainMaster. We will further strengthen ChainMaster as a brand for hoist technology in the event and stage industry.

ChainMaster will continue operations in Eilenburg as a separate company. General management remains in the hands of Susanne Hartung and Frank-Rainer Hartung, who founded ChainMaster in 1996.

Like LIFTKET, ChainMaster is also involved in international projects and has a strong network of sales and service partners around the world providing fast and professional customer service. Like us, ChainMaster focuses on customer needs to guide product development and enforces rigorous quality management in manufacturing.

I will be happy to answer any further questions you may have.

Sincerely,

Jürgen Dlugi

CEO
